

MORRISEC IS COMMITTED TO BEING GREEN!

At Morrisec, we are proud to announce our commitment to sustainability and environmental responsibility. While we may be a small company, we think big in terms of what we can do to support and promote sustainability within our industry and beyond.

DIGITAL-FIRST APPROACH

In our efforts to minimise our environmental footprint, we have embraced a digital-first approach. Our marketing initiatives are entirely digital, and we have eliminated the need for printers in our operations. This reduces paper waste and aligns with our broader commitment to conserving natural resources.

ENERGY EFFICIENCY AT HOME

As a remote-first company, we support our staff in creating energy-efficient home workspaces. We cover the cost of energy-efficient light bulbs for our employees to help reduce their energy consumption and environmental impact.

ENERGY EFFICIENCY IN THE WORKPLACE

Morrisec has chosen a shared workspace that puts sustainability first, for those times when we need to be in the office. Workclub Global has implemented sustainable office solutions during the construction phase, optimising natural light and reducing the reliance on artificial lighting. Workclub also promotes waste reduction through the sharing of space, supplies and other resources.

EMBRACING THE SIX R'S OF SUSTAINABILITY

We encourage our staff to always consider the six R's of sustainability: Reduce, Reuse, Recycle, Refuse, Repair, and Rethink. This mindset is integral to our daily operations and helps us make conscious decisions that positively impact the environment.

WILDLIFE SPONSORSHIPS

As part of our commitment to giving back to the environment, we sponsor either a turtle or a platypus on behalf of each new client we sign. This initiative helps support wildlife conservation efforts and raises awareness about the importance of protecting our natural world.

SUSTAINABLE PRACTICES IN DAILY OPERATIONS

Our commitment to sustainability extends to our daily operations. We provide reusable coffee cups to our staff and clients, promoting the reduction of single-use plastics. Additionally, we carefully vet our suppliers to ensure they do not engage in exploitative labour practices and have implemented robust sustainability practices. This ensures that our supply chain reflects our values and contributes to a more sustainable future.

COMMUNITY INVOLVEMENT

We actively participate in local environmental initiatives and community clean-up projects. We aim to contribute positively to our community and inspire others to join us in these efforts.

At Morrisec, we believe that every action counts. By integrating these green practices into our business model, we aim to lead by example and inspire others in the industry to join us in positively impacting the planet. Together, we can build a more sustainable and environmentally friendly future.
